

## WELCOME TO BITTE & NIELS IN HÖGANÄS

We have had our garden for 16 years. When we moved here, the garden was no more than a lawn, green plants and some roses. The previous owners said, 'There's no point planting anything here, the earth is so poor and nothing grows.' We took on the challenge, and today it is quite a different place, and is home to many common and less common perennials such as peonies, hostas, clematis, crane's bill etc. Even trees have been planted including willow-leaved pear, tulip tree, katsura and southern catalpa.

A few years ago, we built our own greenhouse which we designed from recycled material. There are cultivation beds outside the greenhouse, where we grow our herbs and vegetables. We have a wonderful outdoor patio which extends from our veranda. This becomes our sitting room during the summer months. As we both work, we relax when we come back home to our garden.

Garden visit booked in advance length 1 hour, with a max. of 20 people.

**Season:** May–September

**Location:** Close to the sea, approx. 150 m from Kulleden hiking trail and 150 m to the bus towards Helsingborg and Mölle.

**Other:** We offer samples from local cultivators.
