

# A genuine Swedish family – with a genuine interest in gardens and design.

Welcome to our home!

We are Agneta och Lennart, a 60 year old couple with great interest in design, form and colour. We wanted a garden that was easy to maintain, offering a wide range of places to sit with protection from the wind. The choice of plants is ruled by our coastal soils. In each flower bed we have put down a fabric which we have then covered with flint stones. We enjoy creating different environments in the garden – many smaller, easily constructed wooden structures, such as an outdoor kitchen, tables, benches, raised cultivation boxes, make a garden exciting, and we hope may even inspire you to build your very own environment.

Our interest in colour and form came late in our lives. Carpentry and colour scheming have developed into a great interest. Our products are characterised by their simple constructions which anyone can put together and build. Another enjoyable hobby for us is photographic art – a flower's inner beauty is rarely seen but is well worth the discovery. Thanks to our flourishing interest in this art form, we put together an exhibition with the theme 'a flower's innermost beauty'. Our building work and photographic art are shown during our garden visits.

We look forward to welcoming you to our home!

*Agneta and Lennart*

Garden visit booked in advance, length 1 hour, max. 20 people

**Season:** May–September.

**Location:** Close to the sea, approx. 30 meter from Kulleden hiking trail, 30 to 500 m to the bus towards Helsingborg and Höganäs.

**Other:** We offer samples of local drinks and pastries!
